DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-42 and 61, drawn to a method for transferring funds from a payor to a payee and by printing a financial instrument at the printer of the payee, classified in class 705, subclass 39.
 - II. Claims 43-60, drawn to a method for electronically transmitted a rebate to a user based on received information from the user confirming performance of an obligation of a specified rebate transaction, classified in class 705, subclass 14.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

In the instant case the different inventions are unrelated because as can be seen above each of the invention intends to accomplish a different result using different steps or functions. Invention I, claims 1-42 and 61 does not require offering a rebate to the user in consideration for performance of an obligation of a specified rebate transaction as required in Group II.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and have also acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
